

Wireframe

After clarifying the data structure of the platform, the wireframe was the next step. It allowed me to breakdown the platform into its single components. At this stage positioning, size, and basic functionality of each component were the focus point.

Archive Titel (Home button) sets the page back to the **original state**

Edit Tool (Button) directs to the Archive CMS

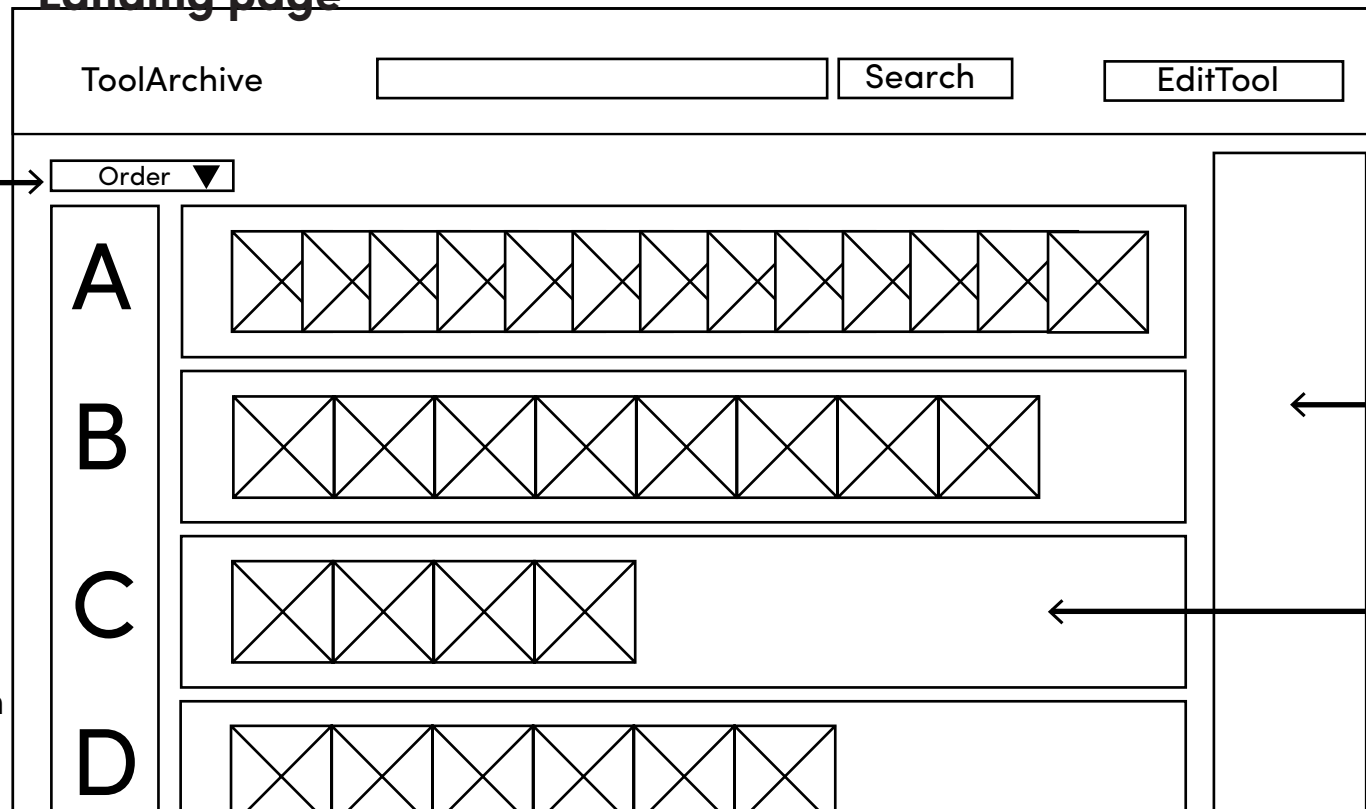

Search the archive

Landing page

Dropdown to change from alphabetucal to chronological order

The content is **chronologically** or **alphabetically** organised in **horizontal** and vertical **direction**

List of projects for quick selection

Each time frame (year/month) or letter is grouped.
